Office Action Summary	Application No. 10/619,861	Applicant(s) PETRICK ET AL.	
	Examiner José V. Chen	Art Unit 3637	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of Figs 1-9, claims 1-35, 45-48 in the reply filed on 03/06/06 is acknowledged. The traversal is on the ground(s) that the embodiments are so similarly related. This is not found persuasive because this is not a proper response as stated in the last Office Action.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Vander Park. The patent to Vander Park teaches structure as claimed including a first structure (fig. 2), second structure in which a power or communications means is brought into and accepted by the other structure.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 5-35, 45-48 are rejected under 35 U.S.C. 103(a) as being unpatentable over Vander Park. The patent to Vander Park teaches structure substantially as claimed, as discussed above including communications between two structures and connectable between multiple structures the only difference being the specific communications between the structures not being particularly a data means. However, the use of different alternative conventional communications between different structures are matters of desirability and choice depending upon the parameters needed and would have been and well within the level of ordinary skill in the art, thereby providing structure as claimed. The method would have been obvious in view of the structures.

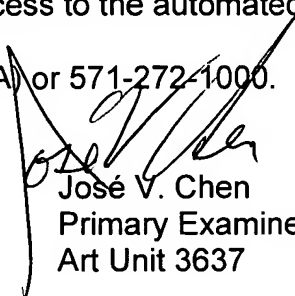

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to King, Favaretto et al, Ryburg et al, Chang, Corpuz, Jr. et al, Rein et al, Funk et al, Gioacchini et al, Dame et al, Ostertag et al, Cronk et al, Keusch et al, Weissenbach et al, Mollenkopf et al, Casey et al, Sykes teach structure similar to applicant's.
